#### **Sean Kelly Gallery: “Mariko Mori: Invisible Dimension”**

March 24 through April 28, 2018

Opening Reception: Thursday, March 22, from 6 to 8 p.m.

In her second exhibition with Sean Kelly Gallery, Mariko Mori will present new sculptures in “Invisible Dimension.”

Inspired by the mysteries of the universe, unobservable dark matter and energy, [Mariko Mori](#) will present seven new sculptures created with the most technically advanced methods currently available. Her sculptures, increased in scale and magnitude to a monumental size, reflect her research into superstring theory and particle physics and represent her speculation of how multiple hidden universes might be represented.

Sculptures inspired by the latest astrophysics theories or representing the beginning of the universe will be set up in pairs, except for the seventh, highlighting how collision and union of two elements create a new reality, like the Big Bang Theory or human procreation. Whether representing a different universe or the human spirit, the artist works to give form to realms that remain imperceptible in nature.

Sean Kelly Gallery is located at 475 10th Ave, New York, NY 10018. [www.skny.com](http://www.skny.com).
